

# Insider Secrets To Marketing With Safelists

Dear Friend, I am simply amazed that more internet marketers are not using safelists as an advertising medium. AdSense marketers... can you imagine what would happen if one of your websites got views from the millions of safelist users out there. "Dime Sale" product creators and marketers of 100 commission products... At these LOW LOW prices, safelist users will jump all over this... All of you "Butterfly Marketers" and "forum owners" and Membership site" owners... safelist users love freebies - how many OTOs would you sell if 1000s of safelist users signed up for your free products. Safelists may be the most important and misunderstood advertising medium ever created for the internet. You could simply sign up today and within 5 minutes be able to send an ad to 100,000+ members. That is the ultimate form of online advertising! On the other hand, no one can possibly read email from 100,000 other people! So Safelist users end up deleting most of their mail with "throw away" email accounts -- like free Hotmail or Yahoo Web-based. Most safelist users never see your ads that are sent. Most safelist users post their ads to safelists and hope for the best. When this fails they complain that safelists don't work any more. Surely you have heard the arguments: Nobody read safelist emails because the same people who

post safelist ads and expect you to read their ads are the same ones that are busy deleting ads that are sent to them. Most people post to safelists to try to their product and are not interested in buying your product. Your ad gets stale over a period of time because the same people are reading the ads. Safelists are unresponsive given the number of ads one has to post just to get a minimal amount of clicks Safelist submitters have hastened the decline of safelist responsiveness. There is a lot of talk that safelists are becoming just as obsolete as the FFA. Are you one of those making these arguments? Is Your Answer To The Following Questions "Yes"? Are you unhappy with your safelist marketing efforts? Are you frustrated because your safelist ads don't work? Are you posting safelist ads with no results? Are you are still struggling with safelists? Have sent out safelist ads but are not getting signups for your programs? Have joined free or paid safelists or purchased safelist submitters but have seen little or "ZERO" results? Are using safelists to promote affiliate programs but have not made "ONE" sale? Do you "have subscribers" but can't get them to buy anything? STOP!!! The problem is simple. MOST OF US ARE SIMPLY USING SAFELISTS THE WRONG WAY And I've got the ANSWER. I have created a report called the "Insider Secrets To Marketing With Safelists".
