HipHop/ Rap with a smooth R&B and rock edge that reaches beyond standard genre boundaries. 18 MP3 Songs HIP HOP/RAP: Rap, HIP HOP/RAP: West Coast Rap Details: The E J album took 2 years to make. We did 30 songs. We did 10 songs featuring Cedric The Entertainer singen and rappin along with E J. All the songs were tight, but we took the best 15 songs and put them on this album and saved the other ones for the "Moodswing Records Vol I" album coming soon. BigChris started a record label (Moodswing Records) under "Kingsbridge Entertainment," Cedric The Entertainer E. Rhone's label in Feb. 2004. We will be doing some of the music for Ced and Erics (Swann) upcoming film productions. The music on the album comes from years of playing rock, latin, reggae, classical and HipHop. BigChris' styles a unique mesh of all the styles he's been playing for years. E J make a perfect compliment to his production style, because they are not just rap. Each of them have a very unique style of rap mixed with a colorful iklectic style of melodies. E (AKA Electric E) has a Belizian/,reggae style that can't be compared to anyone. J (AKA Twin) has a very rythmic style rap with an amazeing melody that makes his hooks superglue to your brain. You'll be singen the hooks on this album for days after you hear them for the 1st time. The "E J" album is something that hasn't been done yet and will be emulated by new artists for years to come. Artists: E J Ernest and Jay came together in ' 84 wanting to make things happen with music. With the help of Lil Daddy da DON, E-Dubb was born and rap music would never be the same. (" Wait'll they get a load of us") The three of us ventured on to create the most incredible lyrical sound. Uh Ooohhhh here comes Big Chris with the sound were lookin for. After many attempts of flirting with success, E J kept on pushin knowing things would get rollin. Moodswing would be the right direction for us. The sound of Moodswing is a blend of what you have not yet heard before and what youre waitin to hear. So who do we say we sound like? " Juss listen To the album; Juss listen to the Mutha@#\$! album!
