Dark clouds move on emotions are your blood Flying to much into a passion is no good for either of us Go through go on go forward go into your heart Leave the pain go into the new world you love This new world belongs to you and to me I go together with you I like it 2) Shake your body Dance on

dance dance in ecstasy Shake your body get in a rage Let the stress the trouble out Keep to the groove

your blood So crazy so enraptured youve got the courage To notice your emotions better than standing
stiff Movement is the elixir you are eternal hey ho believe me Everything around you is pulsating moving
living The ground is vibrating when we are together I love the rhythm of your pelvis hey ho surrender
Body in ecstasy once turning swiftly around sweat in the heat Changed vision you feel so hot you become

hallogene extremes out of the hip pep Senses blur dance like mad orgasmic united in the groove Depart
dance glide into eternity Keep to the groove set your mind out of control stay in this love beat fly with your
unlimited soul 3) Listen to your heart We are sitting around the fire looking in the glow I see your gleaming
eyes And deep inside we fall in connection with the whole world family Connected with all the stars all the
animals and all the flowers Youre a child of nature The shaman takes the stones puts it in the fire The
ritual makes all humans equal rights Its the same if you are red yellow black or white Lets take care for
our planet Youre a child of nature When you swing together with the earth Sing in harmony with the
rustling trees You are pulsating in the rhythm of sun and moon Connected with the stars But you dwell
here on earth which is burning and quaking Nature naked pure sighs doesnt live the way she wants And
you feel nature longs for your love to grow with you You thrive with her you are part of her I share with
you and you notice we swing together Singing in harmony with the earth 4) Love first Love first, first love
thats the way which is good for you What is love what is happiness are you content satisfied crazy for life
Would you like to embrace every day a new Do you feel high supported by the shoulders of existence Or
do you believe you are lonely betrayed by destiny Nobody loves lost not at home Then you missed it you
cheat yourself you dwell in illusions Share what youve got open the door Love is when you give without
thinking of reward I love my boyfriend and I live together with him Over ten years have passed since the
first kiss Im smitten with him in love like on the first day Free love without lies confidence makes us strong
Being together and having many friends Once in a while sex with a stranger without asking Once in a
while alone on a trip having a good time with many girlfriends - Thats all I need Everything else is for you I
love to go with you to bed To cuddle every night to turn and roll I love to perform the act the pact naked At
