

# MP3 Jim Gibson - Music Of The Night: Favorite Melodies From Broadway

[DOWNLOAD HERE](#)

Unique piano improvisations on well-known songs from the Broadway stage, in Jim Gibson's unique "blended" style--a style that mixes different genres as easily as it changes tempo and changes keys.....and it's always relaxing 12 MP3 Songs EASY LISTENING: Background Music, JAZZ: Smooth Jazz Details: Jim Gibson is one of Atlanta's busiest pianists, working for social and corporate clients in many, many different settings. From this experience, Jim has learned that what people sing, hum, and whistle is the melody . . . and so his Hickory Cove recordings are all intentionally melodic. Jim has developed a unique way of recording these CDs for Hickory Cove. He comes to the studio without music, and without pre-conceived ideas of how a song should be played. He then works with each song, playing with ideas until something "works"--a process that may take a long time . . . but that yields interesting and widely enjoyable results. In this collection of favorite melodies from the Broadway stage, you'll enjoy older songs--"The Sound of Music" or "Oh, What a Beautiful Mornin'"--and newer songs like "Send in the Clowns" and "Music of the Night." These are songs by our greatest composers, and you'll enjoy Jim's relaxed and pleasant versions of these great melodies.
