Torrent is a small and incredibly popular BitTorrent client. Micro-Sized Yet Feature Filled Most of the features present in other BitTorrent clients are present in Torrent, including bandwidth prioritization, scheduling, RSS auto-downloading and Mainline DHT (compatible with BitComet). Additionally, Torrent supports the Protocol Encryption joint specification (compatible with Azureus 2.4.0.0 and above, BitComet 0.63 and above) and peer exchange. Resource-Friendly Torrent was written with efficiency in mind. Unlike many torrent clients, it does not hog valuable system resources - typically using less than 6MB of memory, allowing you to use the computer as if it weren't there at all. Additionally, the program itself is contained within a single executable less than 220 KB in size. Skinnable and Localized Various icon, toolbar graphic and status icon replacements are available, and creating your own is very simple. Torrent also has support for localization, and with a language file present, will automatically switch to your system language. If your language isn't available, you can easily add your own, or edit other existing translations to improve them!
