Details: I was born and raised into a family of artists in Colorado, with the Rocky Mountains as a playground, in 1956. My father always listened to swing and jazz, my mother worked for the Colorado Springs Symphony, and add to this the music explosion of the 70's. With a world of music culture all around me and a three dollar harmonica in my pocket my journey was set if I would chose. Thirty some years and 400 harmonicas later brings us to now! "This journey in music is a reflection of life and an expression of visions. Many wonderful people and experiences are in memory and await us. It is an honor to share this journey with you. We are all Passing Through. May you be blessed. Music Heals !!!
