

Mp3 Robodop Snei - Psychedelic Tunes Volume 5

[DOWNLOAD HERE](#)

Psychedelic Groovy Weird Tunes of many kinds, a mix of electro and trance, mysterious moments or trippy melodies that take you into innerspace.... 11 MP3 Songs ELECTRONIC: Trance, ELECTRONIC: Down Tempo Details: this is volume 5 of the "psychedelic tunes" - series, which is a collection of mostly instrumental melodies beats. most of the songs are groovy psychedelic in one way or the other, but there are quite a few different styles mixed together... imagine a fusion of electro, psytrance, garage 80's synthpop, ambient, 60's psy - all styles shaken stirred by a gentle psychedelic storm....

_____ title 1 : "electrofuck" it's a special little song. it's been made after my first few experiences on dance partys. i came home and made this song and i didnt allow myself "too much weirdness / psychdelic outbursts" in it in order to make it sound right for people's ears on dancefloors. a very interesting result..... title 2 : "the bing" yeahh...there's a thing - in the street - that goes 'bing' ! a crazy song. very ambient and still a nice groove... a collaboration with chris tata, a friend from new zealand. he is responsible for lyrics and voices. title 3 : "my mind is blank" so, it was...a little psychedelic unique tune that has a beautiful melodie ! title 4 : "dreamcatcher" what a weird, but interesting song ! the drums drum you into the ground - the melodie is theatrical blows up in a delayed blurred mass. title 5 : "dusty souls" now, this one - groovy, funky, trippy, weird....and great ! title 6 : "old candle" an old hymn that has not preveously been released and is a mellow ride through a nice landscape, unfolding a melodie that is taking you directly into dreamland ! title 7 : "tripgroove" as it says - it grooves. and it has some beautiful psychdelic synths going crazy alongside some insane drum-tom-loops (which are hilarious !) - and brings out a wonderful melodie that is what i call a real psychedelic tune ! title 8 : "dancing shoes" a song that can make you move - it's different, though ! even though it's best discribed as a mix between electro psytrance it has it's own strange sound about it. the

beauty of the song lies in the many different parts and layers and the final fatness (3/4 into the song) the kick gets fat and the songs peaks. great and unusual song-order... title 9 : "strange night" one of the special songs on this cd - a song that is so deep mysterious, spaced out and groovy, but yet so mellow - and then this melodie ! it just takes you away ! title 10 : "dragon curtain" as if a curtain opens and a dragon waits for you behind there...a real trippy mode, experimental, dark and lost in electronic mashed spaceland. title 11 : "into darkness" this song lives mainly from the many guitar-samples that twirl around the layers of mysterious melodies that slowly unfold in the song. it quietens down - then goes bang ! and strikes back with all melodies at once... a true hymn ! _____ robodop snei is a solo project by dan silver that started off 1996 in germany. there have been various cassette-releases in a small number of copies throughout the late 90's. 1999 gave birth to the first cd called "dster/freundlich". a few live appearances followed prior to that release. in december 1999 the base of robodop snei changed to australia / melbourne. "2000 explodiert", the first full length album came out in 2001. since then there have been quite few more releases that clearly have shifted in sound and musical exploration. not all these titles are available on cd-baby but are available directly from robodop snei...so dont be shy, just drop me a line.... contact : robodop snei@hotmail all robodop snei - albums : "duester / freundlich" (ep, 1999) "2000 explodiert" (cd, 2001 - limited to 100 copies) "the golden egg" (cd, 2003) "have you heard of a planet called 'earth'?" (cd, 2004) "psychedelic tunes vol. 1 2" (cd, 2005) "psychedelic tunes vol. 3 4" (cd, 2005) "psychedelic tunes vol. 5" (cd, 2005) subscribe to the robodop-newsletter for more news and all latest info's etc. ! to subscribe, just send an email to: robodopsnei@hotmail.com
