

Onboard Electric Passenger Train - Quiet (sfx Sound Effect)

[DOWNLOAD HERE](#)

This 2'22" onboard electric train recording contains a great variety of sounds within it. There are no other passengers audible. There are lots of squeaks and rattles, you can hear the train going through a bridge, across points, slowing down and speeding up. Be sure to check out my other train recordings. All files on sale by Sevenleaf SFX have been recorded by professionals and are available for you to download as 16 bit 48kHz stereo wav files. Previews are low quality mp3 files with security watermark beeps. Purchased files are broadcast quality wavs without watermarking.
