By the time they realize what's gone wrong, they would be quicker restarting! Blogging is about one thing, and one thing alone. When you get down to it, the successful bloggers have found a niche, and carved out a living. But countless others out there are simply pretending. They've seen the income these master bloggers are making, and are trying to be gurus. But before they found a niche, they researched it and ultimately, if you're setting up your blog on false advice, and not following the Master Plan we discovered, you'll find that the most important areas of effortless traffic generation are forever lost to you. You'll lock yourself OUT of most of them with a few simple mistakes. Costly mistakes that most so called 'gurus' make every day. Unfortunately... most of these gurus will deny that this is important.
