Simply put, blogging is the hottest new form of content, and pinging is how you let the search engines and the world know you've got fresh new content posted. If you do any sort of Internet marketing you can't possibly do without This incredible new software! SEO Can Take Time and a Whole Lot of Money It could take you years and can cost you a small fortune to figure out just the right combinations that make some magical combination of SEO keywords work while others fall flat on their face. I've been there. I went to all the top web gurus and got bids from them on optimizing my website. Sure, one of them said, We can get you at the top of Google. It'll take about six months. Then he e-mailed me an estimate.... \$1,500! And even for all that money, he wouldn't guarantee results! Guess what I told him? Uh-huh, you know Here's my thing: I needed something reasonably priced that would get me up in the stratosphere of search engine results, given that: 1. I don't have time to hassle with SEO, keywords, densities, and shuffling articles around. 2. I don't want to wait 6 months. 3. I won't pay \$1,500. So, in desperation, I called a programmer friend of mine. There had to be a better way. And there was! (And no, I will not divulge his

name. I've got him working on a new project, and he's so good, he'd be stolen instantly.) After extensive research, he determined that that blogs are now considered search engine candy. So he developed a tool, Blog & Ping Automator, that goes out and gets the very best content either from the internet or from your site and posts the first portion of each article into a blog entry. Each post contains links back to your site, so when the spiders find the posts they love so, they also find YOUR SITE! It gets better he's also automated the pinging process to let the search engines know you have new spider food up when a new blog entry is made. The result? Your site gets listed WAY UP HIGH in the search engines without you having to write a word of content!
