Isn't it time you joined the list of experienced marketers who know their emails are getting through the SPAM filters? Stop worrying about SPAM filters, and start reaching your prospects... Are you just crossing your fingers and hoping for the best? It's easy for all of the big marketers to tell you that the money is in the list (how many times have you read that), and that email marketing is the answer to generating mountains of cash, but what they don't tell you is how to make sure your email actually arrives in your prospects' inbox. Why was I worried... Well, let me first explain: I have multiple email lists totalling

tens of thousands of subscribers, customers and members and to be perfectly honest getting my emails blocked by the spam filters wasnt something Id paid a great deal of attention to - until a few weeks ago. Id sent an important email to a friend and he never received it because his ISPs SPAM filters tagged it as SPAM, and trashed it! Now this wasnt an advertisement or sales copy (or spam) it was a 100 legitimate email sent to my buddy but it still wound up in the trash before he got a chance to read it. The only way I knew was when he rang to ask why I hadnt sent it. If this kind of thing is happens with personal emails, what do you think these filters are doing to your business emails? Your subscribers arent going to phone you and ask where your messages are! I decided to delve a little deeper into this problem - and frankly I was horrified - and not doing anything about the problem was more than likely costing me tens of thousands of dollars in lost income every year. So despite what youve been told it doesnt matter how good your email copy is or how great your web site is or even how special the offer on it is. If people dont get the email telling them about it they wont see it. And you dont need to be earning hundreds of thousands of dollars already to know you need to act on this - Just one email a week promoting a \$20 book lost due to an overenthusiastic spam filter could cost you a \$1000.00 a year in potential income - Now you do the maths. Even if you only send emails to 100 people this makes a big difference! What was needed, and fast, was a solution that would automatically check your emails against these Spam Trigger words and replace them with something that didnt get them blocked. Maybe youve seen emails from some of the top marketers where they use terms like get this free or big sale Well I wanted something that injected those special characters just by clicking a button! And while I was thinking about the other things that would help with my email marketing I decided something that formatted paragraphs so emails arrived neat and presentable would be good too. And something that could create both text and html formatted messages depending on which of my lists I was sending to. Easy - that in summary was the type of one click does all software I needed. I didnt think Id have a problem finding a solution - All I wanted was a simple to use program that in just a few seconds could make me more money for no extra effort. So I started looking around to buy something that did it.... But I couldnt find anything that did all that I wanted for less than a couple of hundred dollars..... EEEeek! So I decided to create a solution myself and Im going to share the results with you - Its called: Email Master Pro! eMailMaster PRO can save your time, and energy formatting your emails, as well as SPAM proofing them before you send them out. eMailMaster PRO can be used for all your important messages (business and personal) so that you wont
