Ambient guitar and lap steel with traces of electronica. 10 MP3 Songs NEW AGE: Ambient, ELECTRONIC: Soundscapes Details: "Stray Onto The Path" is a collection of short ambient pieces played on electric guitars and lap steel, with a few keyboards on the last few tracks. Open tunings and Ebow play heavily into the guitar parts. Written and recorded over a few weeks in December 2004 and January 2005, the compositions were inspired and influenced by the dark winter nights. This project was one I did solely for my own enjoyment. Though I never intended to release these tracks on a CD, after many requests and a little airplay on MysticSoundscapes, I decided to make them available.
