Details: ABOUT THE MUSIC With Meditative Spaces, Ibis strives to create a profound textural universe with the beauty and character of a world beyond this one. The music is meant to awaken deeper layers of consciousness, intuition and an experience of timelessness. The past, present and future melt into one and we are taken to a plane where archetypical forms fill us with the profound feeling of being children of the universe ABOUT IBIS Ibis explores the universes created in our being upon entering states of deep meditation, the forms and vibrations of which can be transferred to the listener through music. The compositions are melodic, emotional, energetic, organic and feminine in their nature, as the compositional method relies on natural flows and improvisation. The creation of the music is based on deep meditative experience and years of practicing various spiritual techniques. By "hearing" the sounds prevalent in various spiritual states and translating them into music, the compositions can create a similar meditative space in the listener.
