

Mp3 Polystar - Finished

"Finished" is Polystars' first disturbing message to ex-lovers and future obsessions. Produced by Bostons' Sean T. Drinkwater, this album is a mosaic of pop styles dated in three decades, taking electronic/rock retro music to a very new place. 11 MP3 Songs POP: British Pop, POP: with Electronic Production Details: Polystar is an esoteric blend of Rock, Electronica, Folk, and Disco, with a pop sensibility. Rather than following the recent trend of many bands who try to sound JUST LIKE the 60s, 70s, or 80s bands they admire, Polystar mixes these influences up, making music that is "dated in three decades", while still sounding fresh and different. Songs are typically dark in nature, covering such subject matter as stalking (from the stalkers point of view), betrayal, regret, and darkness itself. They manage to explore these themes in the context of catchy pop songs. Polystar consists of Danny Gold and Theodore Fraser. Sean T. Drinkwater produced and co-wrote Polystar's debut effort, "Finished", and contributed guitar and keyboard to the recording. With very interesting production, song writing and performances this underground pop record is already becoming a true little known classic. Polystar are currently hard at work on their second record featuring guest performances by Roger O'Donnell (The cure, Thomson Twins, Psychedelic Furs) and Boz Boorer (Morrissey, Pole Cats, Bozmen) and are hoping for a December/January Release. Polystar lists Depeche Mode, The Smiths, A-ha, R.E.M. and New Order as some of their more important influences.
