

# Seo Cash Cow: Profitable Seo Made Easy

[DOWNLOAD HERE](#)

Introduction and Overview There are really only a handful of key elements to successful SEO and getting to the top of the search engines. These elements are: -Backlinks -Link Diversity -Anchor Text Variation -Time -Tracking Your Eorts and Results When you keep a record of the links you build to what URLs, over time youll get a very repeatable process to follow, as well as stay up to date with what really works. Tracking Your Results I used to use spreadsheets to track my sites and pages, but now I use Evernote. Evernote is free, and it keeps all your info in one place. To use Evernote, setup each site you have as a notebook, and then each URL or page within that site as a note. Then within each note, you simply keep a record of what backlinks youve built or services youve used and the date of each submission, and then over time youll start to see whats working and what isnt. Ignore 99 of What You Hear About SEO Some SEO courses mention dozens of services you should use... Thats just not true. There are a few simple processes and services that will almost always work, its just a function of putting them to use over time. What those processes are and how to use them are what youre going to learn in this course.
