Pop/Pop Rock/Latin Pop/Classical/R&B 12 MP3 Songs POP: Today's Top 40, POP: Piano Details: There are so many artists out there that want there break just like me, There is so much good music out there in every different genre it's crazy! I just keep going and I always will, because everything has a beginning and an end... Just have to be patient! A little about me... I've always had a passion for music Ever since i was 10 or 11 i would always hum along to everything i heard And even though I could always play a little bit of piano It was something that i was not interested in completely Many years passed by and one major broken heart later I learned to write my feelings down on paper Like I said before, I've always had a passion for music and could always hum to something Or make something completely new from scratch So when i started to write down lyrics from my life I would put my own music that i thought would go well with the story i was telling. 60-70 rough drafts later and over 300 10-15 second samples later I developed my first ever album "Complicated" It was named that because of issues in my life I've had to deal with Personally and Musically, So I've finally found my niche in life Music. Music is what drives me Music makes me happy Music makes me. And hopefully the people that will listen to my music will not only bounce to it but also see how much our lives are the same. Alfonso
