Hard Rock; dark, contemplative and sophisticated. 9 MP3 Songs ROCK: Modern Rock, ROCK: Hard Rock Details: Matt Donner is "Donner, Party of One". The album represents two years of songwriting and production and showcases his skills as both instrumentalist, vocalist, songwriter, arranger and producer. The album is a culmination of all these skills, as most of the music was performed by him. It also showcases some of the Bay area's most talented musicians, from Percy Howard, to Ahmed Azzam and lots of guests in between. The story's all tell of relationships, both good and bad, and chronicles personal tales of love; lost, found and lost again. "Party of One" implies that happiness must come from within and not your partner and that in the end, we are all alone. The emotions range from rage to sullen to elation to flatness and the album has a flow that is organic and powerful. It is the spirit of the lost art of "album rock" that is presented here, and the consistency of theme is matched only by the consistency of sound and production. This is a powerful record and is deserving of a spot in history.
