Love comes and goes leaving joy and pain along the way, so relish the moment with Virginia's newest two track release of contemporary country/pop material with beautiful acoustics for your listening pleasure. 2 MP3 Songs in this album (8:11) ! Related styles: COUNTRY: Contemporary Country, POP: Today's Top 40 Details: The love of music..and I know I speak for all musicians ..its deep inside you..just waiting for the next lyric to explode out of you ..the next note to roll off your fingertips. And then the amazing crafting and final production hot out of the studio. What a rush when you hear the song for the first time..I think back to my first chord I learned on my guitar and that silly little love song I wrote at eleven years old..love. what was love at eleven ..so funny and fresh in my mind. I remember my dad calling the radio station at six in the morning and telling the DJ to announce to the town that his daughter had a three minute song to sing live , on my birthday to. and trying to sing at six a. m . . oh my goodness .I was a wreck so funny . I am grateful .. being able to be a part of the music industry . Sharing my thoughts with the world and meeting so many wonderfully talented people musicians and writers. Being inspired by far away places, places unseen ..or only in pictures..writers inspiring one another thru texting with so many ideas , it is so amazing the technology has moved us into another dimension. Trying out a two track cd was an experiment to me with Angels and Demons picking out the best material I had to publicly release hoping to connect to anyone who loves music hoping to be comparable to my first release Cowboy Shakes ..Angels and Demons was so enjoyable to me to promote that I am doing it again with Pinch Myself. With two love songs. both going in different directions with love the acoustically sad I didn't ask for this .and then the quirky playful fun Every Once in awhile I have to Pinch Myself. To all the music lovers of the world thank you for listening ..and I hope you enjoy this latest project Pinch Myself as much as the previous projects Virginia Grey loves you!!! Oh yeah and always thank you CD BABY!!!
