

## Killer Text Package

[DOWNLOAD HERE](#)

Killer Text Is As Easy As Pressing A Few Buttons... Want to spice up your graphics? One easy way to make any kind of graphics look good is to add cool looking text. This one change alone can turn a plain boring design into something eye catching. The fact is that text plays a major part in any design. If you have good enough looking text, you dont even need any images. Killer text will spice up and make any design better. But its not that easy to create killer text if youre not a design professional. I know this from experience, as I used to struggle myself with text in my early days as a designer. But along the years Ive picked up some skills, and created some shortcuts for myself to make the text creation and formatting easier. Basically, killer text boils down to 2 things. Fonts and Layer Styles. Combining these 2 things together will create truly eye popping text effects. And the good news is that Ive done the legwork and compiled a nice collection of fonts and layer styles for you to use. Its really simple to create killer text yourself once you have the proper fonts and layer styles.
