A Classical New Age Spiritual Journey 9 MP3 Songs ELECTRONIC: Virtual Orchestra, CLASSICAL: New Age Details: Not country music - a symphonic, electronic spiritual journey. Totally different and a completely pleasant listening experience. RainBow Rider includes both studio and live improvisational work by Sam Utah. There is poetry, drama, sweep and a progressive spiritual journey built into Sam's orchestration. The inspiration, title, image and cover are used by permission from a painting by Downe Burns (downeburns.com). This album is based on a "concept" and it includes Sam's impressions of a morning ride after the rainfall. A young rider mounts his Arabian mare and along with his dog they all ride out to a rainbow and then they go inside the rainbow for some "light-therapy". The rider finds the experience exhilarating and illuminating and you will too. This is an album that rewards the patient listener. There are jewels in the sands of time and Sam points them out to you. Lay back and go on that inner journey where at the end you meet your beginning.
