Ambient with a pulse, electronica with a heart, environmental music with soul. Sol Luna has created lush, scintillating electronic landscapes that are so simple they're complicated to accompany the sounds of the sea. Beautiful guitar work. 8 MP3 Songs NEW AGE: Environmental, ELECTRONIC: Soundscapes

Details: Sol Luna y las Estrellas is the pseudonymous name of a group of talented musicians who seek to use natural sounds as a setting for their music, and their music as a setting for natural sounds. Their hope is that the listener will have the experience of "a concert amongst nature," and that their music will have some of the healing power that being out in nature can bring. Imagining the Waves is the first in a 4-CD cycle by Sol Luna y las Estrellas, to include Imagining the Storm, Imagining the Rainforest, and Imagining the Woodlands.
