Sounding Rick takes his brand of power pop to Japan for a knockout live CD. 12 MP3 Songs POP: with Live-band Production, ROCK: Progressive Rock Details: When Sounding Rick arrived at Kansai airport in Osaka, Japan he not only brought his band, he also brought his unique brand of American power pop. Live in Japan is Ricks fifth record released in just 24 months (a mammoth feat for an independent artist). The 12 tracks for Live in Japan were recorded in front of multiple audiences in Osaka, Kobe, Nagoya and Nara during the two-week tour in October 2006. Even with the language and cultural differences, it is clear that there was a connection between Rick and the Japanese audiences. On some tracks you can actually hear the crowd singing along ("Oh No" comes to mind). The record begins with three songs recorded at the same performance in Osaka at the famed Sun Hall. "Long Time Ago", "Left Your Mark" and "Man in Space" set the tone for an exciting experience. It is interesting to hear the different audiences in various cities and how their enthusiasm transcends verbal communication. The last two songs provide a real treat, 1) Our first listen to the previously unreleased Sorry Charlie and 2) super-powerful show stopper, Chim Chim Cher-ee (not your mommas Mary Poppins for sure). This CD is a great addition Sounding Rick's rapidly growing body of work.
