R&B, Pop, Love Songs, Rap, Hip Hop...Thaddeus Carlton's "Superdelicious" CD has everything for everybody. 15 MP3 Songs URBAN/R&B: R&B Pop Crossover, POP: Today's Top 40 Details: Hello again...You and I seem to be doing quite well...I'm still making music for you and you are still buying my songs. I am so happy to be blessed with the opportunity to do what I do that I would do it for free...but if I did it for free, I couldn't do it very long because in order to do your best, one needs to get paid...One also has to make a living at what he or she enjoys. From my observations, I calculate that more than half of all people dislike their jobs...This is a very alarming statistic due to the fact that half the time that you are awake you're at work! Most people justify their participation in a job that they don't like with the phrase "I've got to do what I gotta do!", or "I hate it, but it pays the bills!"...I'm sorry but if you hate your job, you are hating part of your Life...and that is some sort of crime against ourselves. In every album, I make an attempt to cheer people up...give them a new perspective or awaken a point of view that they already have but may have forgotten. The song "Merry Christmas" is quite uplifting...Hey wait, I wrote it,...how can I say that it is "uplifting"? Because when I write a song I can feel it's motivational power because I am "people" too. "Merry Christmas" is an original composition by me, Thaddeus Carlton written in the tradition of holiday songs. It puts emphasis on Christmas being the time when we get together with our loved ones and share the activities and fun we will never forget. 'Enjoy Life' is the underlying theme in many of my songs...Never forget your family or those people who mean a lot to you!...The song "Friends Til The End" puts emphasis on the fact that sometimes your best friends are not in your immediate family...This song was written for my best friend Falaniko Ateliano Naseem Ioane who has been there for me for a Lifetime...There are other friends who have been very helpful in my Life like Kenneth Wayne Tyler and Jackie Mills...From Time To Time, I've received support from many good Friends...Thank You All...I

wouldn't be who I am, if you were not who you are! Let us all keep in mind that immediate family members often get taken for granted...Their contributions to One's Life are sometimes overlooked because we seldom respect people who we feel are 'obligated to be our family'. "Superdelicious" is a song that is about a woman who is so fine, the words in the dictionary are useless to describe her...Hence the name "Superdelicious"!!!! "Jesus Is Our Savior", comes to you at a Time when people are trying to distance themselves from The Church, a Time when movies like "The DaVinci Code" challenge whether Jesus was supernatural or not..."Jesus Is Our Savior" promotes the concept that Jesus Is Lord regardless of our attraction to controversy, regardless of all the possibilities of who Jesus really was, He is the most influential figure in World History for a reason. The reason is to stimulate Human Belief! The world works on Belief! In the past century or so, the Human Animal has been lacking in their Beliefs. We are attempting to be superior to God as we reject theories of The One diety that created us all (It doesn't matter that some of us know Him or Her by a different name)...This Universe may have been started by a "Big Bang" but it took a "Big Hand" to mold the molten lava, to create Human Beings and to bring Love to The World! "Another Bad Hair Day" captures how you feel on those days when nothing is going right! The song also cautions you not to be overwhelmed by dismal events, keep your head up..."Things will do what they're gonna do". A "Bad Man" (is better than no man at all). I was inspired by a woman's story of how the father of her children was the worst thing that had ever happened to her but his Effect (her children) made the horrible experience with him worthwhile. Everybody knows what the "Cryin' On The Inside Blues" is! Its when you see someone that you love romantically with someone else but you can't just come out and say "This Sucks!!!!",...you have to be diplomatic and say something like "It is my pleasure to meet you.", when you really want to scream!!!! You're hurtin' so deep inside...That's the "Cryin' On The Inside Blues" If you're getting married anytime soon or anytime at all...May I suggest that you use my song "This I Promise" as your wedding song?...(This is really not a question, it is an order! "THIS I PROMISE" IS YOUR WEDDING SONG!!! Learn to chill out, take it easy...relax...Don't rush, especially while driving. It is better to lose a minute of you Life than to lose your Life in one minute!
