An energetic, exciting and edgy synthpop band from England. 10 MP3 Songs ELECTRONIC: Pop Crossover, POP: with Electronic Production Details: The Nine plays a great blend of hard-edged electronic music with melodic vocals. This debut album has already built a lot of anticipation for future releases from this hidden British treasure. One fan wrote: Infectious synthpop from a talented duo on the A Different Drum label. Each and every song on Native Anger impresses me. Beats and hooks on this album often border on aggressive and at times even EBM-esque. Not much fluff here! Most tracks follow the formula of building up slowly to a climatic chorus. Stand-out tracks include "Balance of Minds" and the somber "Midnight Son."
