Ringtone Website

[DOWNLOAD HERE](#)

RINGTONE WEBSITE IMPORTANT REQUIREMENTS: Web server with PHP4 or above. That's it! :)

************************************* Your web host MUST offer php support for this script to work!!!!! This script will not work on crap "free hosts." If you need reliable 500MB web hosting or more scripts ************************************** DISCLAIMER: This script has been tested on a Unix Web Server and is in full working order but it is sold AS IS with no warranty. It is not guaranteed to work on Windows hosting or hosting with crap site-builder software.

*** VERY IMPORTANT !!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!! This ringtone website script works in conjunction with Mobile Money.com, a company from the Netherlands that supplies the mobile content and pays you very well for sales. :) They deal with all sales and deliver content for you to the customers mobile phones. You don't have to do anything apart from promote your website! YOU WILL NEED TO GET AN AFFILIATE ACCOUNT WITH THEM FIRST! You will not be able to earn commissions from sales otherwise. To get your free affiliate account, go to It's free to join! They will pay you monthly by bank account transfer (in EUROS) as long as your sales total is 25 EUROS or more. Commissions under 25 euros will be rolled over to the next month. When you sign up you will be able to choose a USERNAME which you will NEED to insert into this script. (This is mentioned in more detail in the INSTRUCTIONS below.) Once you have done that, you are ready to install your website. *** NO SELLING OR UPDATING REQUIRED: Your ringtone website will earn you money, without you having to do anything. :) Mobile Money handle all sales. All mobile content is delivered straight to the customers phone. All content on the website automatically updates daily. All YOU have to do is promote your website to the world. :) *** INSTALLATION INSTRUCTIONS: Installation is quite simple. You do NOT need a database. It's just a case of configuring TWO files and uploading the website script onto your server. The files that need configuring are : configuration.php submit.php Nothing else will need changing as these two files control everything on the website. I've made it as simple as possible. :) 1) Open configuration.php This is where most of the template (and configurations) of your website are kept. You need to change the following configurations: 2) CHANGING THE WEBSITE TITLE: Locate the following piece of code in configuration.php: function title() { echo 'Big Fat Ringtone Website - '; } Change Big Fat Ringtone Website to whatever your website will be called. 3) ADDING YOUR MOBILE MONEY AFFILIATE ID/USERNAME: Locate the following code in configuration.php: function id() { echo

'&refname=USERNAME&language=en'; } function id2() { echo 'USERNAME'; } In both cases, replace USERNAME with your Mobile Money affiliate ID. ONLY change USERNAME. Don't touch the surrounding code. 4) CHANGING THE LOGO: Locate the following code: function topheader() { The html after that is the top part of your website. Locate /images/yourlogo.jpg and change yourlogo.jpg to whatever your logo is called. The size of this logo is 200 x 50 pixels. It is best that your logo is the same size otherwise you'll have to change more of the Header code. Remember to upload your logo into the images folder when you upload your website. 5) CHANGING OTHER THINGS: To change the colours find function css() { and edit the html. To change the metatags find function metatags() { and edit the html. To change the copyright info at the bottom of the website find function copyright() { and edit the html. After that, you probably do not have to change anything else in configuration.php (optional) If you want to change the look of the website header find function header() { and edit the html. If you want to change the look of the website footer find function footer() { and edit the html. 6) CHANGING THE CONTACT EMAIL ADDRESS OF YOUR WEBSITE: Open submit.php This controls emails sent to you from your Contact Us page by visitors on your website. Change the email you@yourbusinessto your main contact email. After that, configuration is done. 7) UPLOAD YOUR WEBSITE Upload all the files and the images folder (containing the images) onto the www or public_html folder your web server. Don't forget to ALSO upload your OWN logo into the images folder. YOUR WEBSITE INSTALLATION WILL NOW BE COMPLETE! IT IS FULLY AUTOMATED AND WILL RUN COMPLETELY ON ITS OWN.

+++ IMPORTANT INFORMATION +++ CHANGING THE PRICING: The default retail pricing of the mobile content is 3.00 for most content and 4.50 for games. You can SET your own choice of PRICES in your Mobile Money Admin Area You'll find it under Settings End User Pricing Once you are in End User Pricing, simply select your country and you'll see the prices. You'll have to change the prices of each item individually. VIEWING SALES STATISTICS: You can view your sales states in real time and the commission earnt in your Mobile Money Admin Area at Simply log in an click on View Statistics. IMPORTANT..... If you ever get any customers emailing you, saying that they have not received their order (this is rare but does happen) then simply give them the url of your Help Page, (yourwebsite.com/help.php) where they will be able to fill out an online Support Form. The Support form is then automatically sent to Mobile Money.com (All support is handled by Mobile

Money.com. They will sort it all out for you.)
