

Interpolation, Schur Functions And Moment Problems

[DOWNLOAD HERE](#)

1;Contents;5 2;Editorial Introduction;9 2.1;References;11 3;Basic Boundary Interpolation for Generalized Schur Functions and Factorization of Rational J-unitary Matrix Functions;12 3.1;1. Introduction;12 3.2;2. Auxiliary statements;17 3.3;3. The basic interpolation problem at one boundary point;22 3.4;4. Multipoint boundary interpolation;28 3.5;5. J-unitary factorization;31 3.6;6. A factorization algorithm;34 3.7;References;38 4;Discrete Analogs of Canonical Systems with Pseudo-exponential Potential. Inverse Problems;41 4.1;1. Introduction;41 4.2;2. Preliminaries;44 4.3;3. Inverse scattering problem;54 4.4;4. Other inverse problems;57 4.5;5. Inverse problem associated to the asymptotic equivalence matrix function;63 4.6;6. The case of two-sided first-order systems;64 4.7;7. A numerical example;66 4.8;8. An example of a non-strictly pseudo-exponential sequence;68 4.9;9. Jacobi matrices;69 4.10;References;73 5;Boundary Nevanlinna Pick Interpolation Problems for Generalized Schur Functions;76 5.1;1. Introduction;76 5.2;2. Main results;81 5.3;3. Some preliminaries;86 5.4;4. Fundamental Matrix Inequality;93 5.5;5. Parameters and interpolation conditions;99 5.6;6. Negative squares of the function;113 5.7;7. The degenerate case;118 5.8;8. An example;124 5.9;References;127 6;A Truncated Matricial Moment Problem on a Finite Interval;129 6.1;0. Introduction and preliminaries;129 6.2;1. The moment problem;131 6.3;2. Main algebraic identities;136 6.4;3. From the moment problem to the system of fundamental matrix inequalities of Potapov-type;137 6.5;4. From the system of fundamental matrix inequalities to the moment problem;144 6.6;5. Nonnegative column pairs;151 6.7;6. Description of the solution set in the positive definite case;155 6.8;7. A necessary and sufficient condition for the existence of a solution of the moment problem;168 6.9;8. Appendix: Certain subclasses of holomorphic matrix-valued functions and a generalization of Stieltjes inversion formula;169 6.10;References;178 7;Shift Operators Contained in Contractions, Schur Parameters and Pseudocontinuable Schur Functions;182 7.1;0. Introduction;182 7.2;1. Shifts contained in contractions, unitary colligations and characteristic operator functions;185 7.3;2. Construction of a model of a unitary colligation via the Schur parameters of its c.o.f. in the scalar case;192 7.4;3. A model representation of the maximal shift V_T contained in a contraction T ;214 7.5;4. The connection of the maximal shifts V_T and V_{T^*} with the pseudocontinuity of the

corresponding c.o.f. .;227 7.6;5. Some criteria for the pseudocontinuability of a Schur function in terms of its Schur parameters;232 7.7;References;255 8;The Matricial Carath eodory Problem in Both Nondegenerate and Degenerate Cases;258 8.1;0. Introduction;258 8.2;1. Preliminaries;260 8.3;2. On particular matrix polynomials;264 8.4;3. Description of the set;270 8.5;4. Resolvent matrices which are constructed recursively;279 8.6;5. The nondegenerate case;286 8.7;6. The case of a unique solution;290 8.8;References;295 9;A Gohberg-Heinig Type Inversion Formula Involving Hankel Operators;298 9.1;0. Introduction;298 9.2;1. The indicator;300 9.3;2. The main theorem for kernel functions of stable exponential type;302 9.4;3. Proof of the main theorem (general case);306 9.5;References;308 10;Linear Operators and Linear Systems;310 EAN/ISBN : 9783764375478 Publisher(s): Springer, Berlin, Birkhuser Discussed keywords: Interpolation Format: ePub/PDF Author(s): Alpay, Daniel - Gohberg, Israel
