

# Linearization Of Affixes

[DOWNLOAD HERE](#)

Chapter 1 Introduction. Introduction. Theoretical assumptions. Interface requirements. Bottom-to-top syntactic derivation. Syntax all the way down . Linearization . Proposal: local spell-out. Alternative models for the timing of spell-out. Affixal predicates in Nuuchahnulth. Research context. Genetic affiliations. Previous literature. Overview of word structure in Nuuchahnulth. Methodology. Outline of the book.- - Chapter 2 PF Incorporation. Introduction. Morpho-phonological dependency. Linearization is local. Iterativity. Modifier incorporation. Adjective incorporation. Adverbial incorporation. Coordinated objects. Insensitivity to syntactic category. Absence of LF effects. Discourse transparency. Absence of scopal effects. Opacity effects. Opaque DPs and the bare nominal requirement. Opaque CPs and restructuring effects. Impermeability of saturated domains. Conclusion.-- Chapter 3 Clausal architecture of Nuuchahnulth. Introduction. Linearization of syntactic terminals. A universal linearization scheme?. Directionality is determined at spell-out. Directionality conventions. Comparison to headedness parameters . Affixation patterns. Directionality conventions of Nuuchahnulth. Configurationality. Partial head marking. An asymmetry in possessor raising. An asymmetry in incorporation. Weak Crossover effects. Predicate-initial word order. Proposal: Basic predicate-initial order (VOS). Evidence for right-branching specifiers. Evidence against verb-raising. Evidence against raising of verbal phrase. Implications for the linearization of affixal predicates. The complement effect. Evidence against directionality of affixation. Cliticization domains. DP domain. CP domain. Conclusion.- - Chapter 4 Nominal complements of affixal predicates. Introduction. Predication configurations. Basic structures. Transitivity. Flexibility in theta-role mapping. Predicate inventory. Unergatives are necessarily non-affixal. Unaccusatives. Incorporation. Intransitivity in Nuuchahnulth. Absence of unergative affixal predicates. Long possessor raising as a diagnostic for unaccusativity. Transitives. Incorporation. Subject agreement. Possessor raising. Extended unaccusatives. Locatum predicates. Incorporation. Subject agreement. Possessor raising. Location predicates. Incorporation. Subject agreement. Possessor raising. Ditransitives. Locatum-type ditransitives. Location-type ditransitives. Serial verb affixation. Conclusion.- - Chapter 5 Verbal complements of affixal predicates. Introduction. Two classes of verb incorporating

affixal predicates. Affixal main predicates. Affixal auxiliary predicates. Affixal auxiliaries are non-thematic. Rigid vs. alternating complementation. Ability to license a mismatched subject. Citation forms. Summary. PF Incorporation occurs only in infinitival environments. Absence of clausal morphology. No tense. No person/mood agreement. No complementizer. Lack of clause-boundedness effects. Long wh-movement. Long possessor raising. Long possessor raising with affixal auxiliaries. No long possessor raising with affixal main predicates. Conclusion.- - Chapter 6 Implications. Introduction. Summary. Theoretical implications. Spell-out is strictly interpretive. Comparison to phasal spell-out. Variation in permeability of CP domains. The status of the vP domain. The head movement question. Linearization is purely phonological. Syntactic head movement is more complex. Local spell-out creates outside-in dependencies. Inside-out dependencies are not possible via local spell-out. Evidence from Kwakwaka'waka (Northern Wakashan). Affixation as primitive or derived. Typological implications. The typology of noun incorporation. The governing/restrictive hypothesis in Wakashan. Lexical suffixation as an areal feature of the Pacific Northwest. Conclusion.- - References.- Appendix: Orthography. EAN/ISBN : 9781402065484 Publisher(s): Springer Netherlands Format: ePub/PDF Author(s): Wojdak, Rachel
