Electronic Funk 12 MP3 Songs ELECTRONIC: Funk, ELECTRONIC: Dance Details: Enter: Louis Farrar. The six foot three giant moves through the crowded Atlanta airport easily, lips curled into a slight and confident smile. This is the kind of man they grow in the dirty south, in the Crescent shaped city famous for its jazz and jambalaya, and infamous for its dirty deals and perpetual vice driven parties. New Orleans aint never heard nothing like this! They told him. They were right. The music is a powerful mix of modern Electronic Funk inspired by the musical innovations of Prince in the 80s and the earthquake beats of Hip-Hop in its continued metamorphosis over the last two and a half decades. Funk, Trance, Techno and Hip-Hop fused together to become what Farrar calls Cinematic Hip-Hop. At a recent studio session Farrar said, All those years in the studio, working with Black Matrix and the Nubian Front finally paid off. Thank God. People are gonna like this.
