It's like getting shot in the face while listening to Lustmord. 21 MP3 Songs ELECTRONIC: Industrial, ELECTRONIC: Dance Details: Nerol Drehpehs was born in a poop mill out in eagle creek oregon, and they've been making industrial music since they we're born. The gang used to steal Throbbing Gristle records from Rob Halford to listen to while huffing gas all day while ditching school ... Then the internet was born, and all the synthesizers magically went inside the internet and made it so Nerol Drehpehs could make shock rock. So anyway, if you have a girlfriend that you hate, you should buy this album, because the music will make her really upset (and that's funny)... also, if a governmet agent forces her to take acid while listening to this music, she will have a very bad acid trip, and that is also funny. this music is very upsetting, and i think it's very funny to traumatize people with the gift of sound. If you have young children, this music will indeed make them grow up to be very bad people, like we are, (but that is also funny)
