Acquisotic defines a new Genre of Reformist Pop music, wild melodies with awing instrumentation, and creamy guitar work. 11 MP3 Songs POP: Way-out POP: British Pop That's How Dreams Go Songs

Details: This unbelievable world-class secrete from Acquisotic proves that a very unique band can create a new genre of music. This Experimental Reformist Pop style has taken years of musical experience and development to cultivate. This band of one single creatively brilliant artist is full of deep intensive musical structures combined with philosophical lyrics with some darn right creamy guitar work and powerful active moving melodies. I hear there's another new CD in the works! Some favorites on this CD are the unusual "Edge Of Your World", the awingly cool award winning instrumental "Smooth Landing", the vocal dancing in the song "That's How Dreams Go". The popish "It's not learning" and the story style of "Sadie Oh and Slide" are also solid winners. But they are all interesting cuts on this CD. Have fun listening to them!

Here's the thoughts of a few fans and critics: A seattle music critic "Acquisotic is the essence of this new genre of experimental progressive pop music. This is one of the most interesting and fun artists I've had a chance to listen to in years. The songs are complicated and deep with extreme attention to detail. Oh sure, there's a rough edge non mass produced edge to it in places but the content made me wonder how this guy could possibly have done this by himself. It just added to the shine and culture of this slyly produced gem. There's no shortage of beautiful guitar work and talent on this CD." Steve Grimes

"Acquisotic is unbelievable. Every song is like a painting in a tapestry of sound. I couldn't stop listening to this CD. Finally some creative quality music. I can't wait for the next CD to come out!" A german fan.

"What a jazz. The melodies from Acquisotic are all over the place, it pulls me on from beginning to the end of every song but yet in these melodies I still can't stop hearing the songs in my head over and over again verse by verse. I'm hooked." Rick Bradley "The band, or I should say this guy? He really surprised

me. I loved the guitar work. It also seems like everytime I hear a song I keep finding more things in it, he really put a lot of musical ideas into the songs he created. The voice is really unique too, like wow, it's sort of a modern Jon Anderson with some Beatles or something." Tim Long The songs created by Acquistotic are typically, but not always, in a story form. Song are created in movements there can be multiple bridges and verses that have a variety of different structures. If you haven't heard the band yet, connect to Acquisotic and get a new experience in music that touches the inner self and leaves the old school repetitious dull songs behind.
