a U.S.-Spanish rock/electronica hybrid experimental sound. 14 MP3 Songs LATIN: General, ELECTRONIC: Pop Crossover Details: ATU might be the first driving force of the U.S.-Spanish ethno/experimental sound. Refreshingly provocative and artistically lucid! ATU's Transcultural is a poetic musical journey that contains an intriguing collage of experimental songs. It is a mixture of the Spanish and English languages that becomes a sharp representation of his in-between cultural hybridity. Transcultural's diverse moods and infectious rhythms will leave the listener discovering more with each play. Bringing to his work the electronic perspective of a Latin American who lives North and South of the border, his sheer diversity "is" his art. Fusing and playing across musical genres, ATU is constantly reinventing his multicultural world. Provocatively, he explores techno-sonic traditions with songs where new and diverse styles converge to compose a unique contemporary discourse. ATU's musical sensibilities are perfectly "in tune" with a new sense of culture.
