CHROMIUM BLITZ "HARDTIMES" - HAS DEFINITIVE EPIC ALBUM QUALITY This Hard Rock power quartet crosses the Metal barrier one way and heads the opposite direction with stylish, melodic musical passages on their debut CD, Hadtimes. The CD captures the classic, "up in your face" sound that made the heavy hitters of the 70's, 80's and 90's a known force to reckon with. As you start track one you have an instantly haunting introduction that preludes the up tempo, Ozzy induced, Sabbath styled riffer, "Contrivance" which instantly grabs your attention with the pounding drums and grinding guitar riffs, topping it off with a dark feel in the chorus and overall lyric content. The mood soon get's in the up mode with the funk-metal groover, "Good Thing" which quickly reveals the groups talent by showing there's another lead vocalist, in this very dynamic rockfest of variety at it's peak. They demonstrate "about face" versatility with the orchestrated acoustic ballad, "Baby I Smile", tugging at your heart strings in the same light as supergroups, Chicago and legends of yesterday, The Beatles. But, the band doesn't stop there and shows yet another unsuspected twist to the mystery by showing their roots of down south, and captures the esscence again with the bluesy, "Til the Bitter End", showing you that there's a little bit of Lynyrd Skynrd in the hardest of rock bands. Overall, this CD will remind you of the day when you could buy a record and every song on it was good. There is something for on this album for everyone to enjoy, regardless of age and musical taste.
