Pink Floyd meets NIN meets Joe Satriani (not in that order) 13 MP3 Songs METAL: Progressive Metal, ROCK: Hard Rock Details: Born out of a studio project in 1998, J Hotel perfected their sound over the course of 4 years. After various changes of sights and sound a 4-song disc was dropped on the world in 2002. From the infectious "Adventures of Chucky the Cat" to the hypnotic throb of "Slowcrawl," the band began to break live on the scene. After a fistful of shows and a desire to move forward, 2003 saw the full-length debut "Clandestine Dreams" released featuring "Wonder," the close "Little Grey Encounters" "Do What you Will," and "Violence." The dawn of 2004 has given birth to more live shows, more studio sessions, label interest, CDBaby and the ultimate website --- Jhotel.org. The quest for tomorrow is on.
