Through concept music, poetry and art the legend is reborn in this first release of a three part CD collection. It is an unknown time. The forest around is teeming with wisdom and life. Reaching for the stars, but rooted to the rituals of the past, these beings remain eternally righteous where they stand. But one adventurous soul lifts it's roots and begins the journey toward the great deserts beyond the forest. It is rumored in our own history that the forests around were created from one single tree. Although Wandering Tree is at home within the New Age community, it is really a universal story of boundless human exploration. With themes such as passion, innocence, and adventure, Wandering Tree is the CD to take with you on your own life journey. Brought to life with aural landscapes, urban rhythms, and ethnic voices this artistic venture will create the vision, then guide you through the forest of the mind. Where this CD delivers you to the threshold of youthful passion and innocence, the next CD in the series will pick up on the illusions we create around our lives and the Sirens we invite. The final CD in the series will rest your heart within a state of grace and reflect upon the power of intent. Each CD is it's own story...and the three stories are a single vision of the Human Experience: Innocence, Illusion and Grace. In the end, it is you who creates your own destiny and it is Wandering Tree who will have been your journey's companion.
