Dear Friend, There are now more web pages in existence than there are people on this planet, with an estimated 20,000 new web sites appearing every day. No matter what subject you choose for your web site, you'll find there are many, many others targeting the same area. To compete in this environment, your web site needs to meet the very highest standards. It must look professional and be easy to navigate. It must use the latest techniques to attract and retain visitors. It must apply the latest proven solutions for maximizing sales. It must incorporate the latest security against thieves and hackers. To help you with all this, you'll need a range of professional webmasters tools and resources along with tutorials and guides to show you how to apply them. There are hundreds of sites offering you their latest tool, ebook or other resource for developing one aspect of your online business. Buying them all separately could cost you thousands of dollars. But now there's a single toolkit that provides all the tools and resources you'll need to get started. Inside this toolkit, you'll find literally hundreds of tools and resources. This low cost package provides everything you need to create, market and secure your own professional,

successful web site, no matter what subject matter you choose ...

----- Your Own Professional Order Pulling Site

Starting out with a professional web site design is essential if you want to succeed. So many people create their first site without first understanding basic concepts and without the resources to create a professional result. Inevitably their site fails and they walk away disappointed. It is possible to create a professional site from scratch without any experience, but you need the right tutorials and resources ...

Professional Web Design Tutorials Our comprehensive set of web design tutorials provides all the information needed to build and maintain a great looking, user-friendly website. Inside you'll find downloads for hundreds of webmasters site building resources including: Over 50 ebooks and resources on website design and related topics. Quality web design editors, graphic editors and optimization tools. Lots of ready-made website graphics. HTML, CGI and web design tutorials, tips and resources. Below are brief details of just a few of the many tutorial guides ...

The Genius Guide To Web Design provides information and resources to build and maintain a great-looking, user-friendly website - all packaged in one easy to read ebook.

Build Your Own Web Site This introductory ebook is aimed at those just starting out, providing an excellent overview of how to build your first web site.

How To Build HTML This educational ebook contains 18 chapters teaching the ins and outs of web page HTML. A great place to start for those new to HTML.

Web Site Tips And Tactics Over 150 pages of advice and tips for webmasters covering topics such as search engine placement and the best places to get free resources.

Killer Mini Sites. Mini Sites are simple (but powerful) one or two page web sites that sell a product. Creating a mini-site that makes visitors flip-out their wallets and order your products is not as easy as it looks. Now you can get a deep down dissection of the most successful mini sites on the web and exclusive access to this 9-block formula for creating "killer" mini sites.

Webmaster Training Video Sets If you prefer to be shown visually rather than reading about web design, our 3 video sets provide a great solution. They will guide you through a variety of basic steps to developing your web site. The videos run directly on your PC.

Professional Website Templates If you've surfed the Internet at all, you will no doubt have seen some of the very large number of unprofessional looking sites. Most new web sites look like they were created by a new webmaster. An unprofessional web design will instantly lose credibility, costing you visitors and sales. You can of course use a professional web designer to create a site for you, but this is generally very expensive. There is however a much lower cost option, which allows you to

benefit from the skills of a professional web designer without the high costs. Many professional designers create special "web templates" which they allow others to use and modify to fit their requirements. Our toolkit includes around 400 ready-made templates, covering a wide variety of web site subjects and themes, and all created by professional designers. By searching through the templates, trying different ideas and choosing the best template for your requirements, you should be able to create a professional looking site with ease.

Professional Design Tools To create a site quickly and easily from your chosen template, you'll need web design tools. You will of course need an HTML editor and a graphics editor and we'll provide you with a full selection to download, allowing you to choose the one that suits you best. As well as these essentials though, you'll find it a lot easier if you have at your disposal a range of specialized tools to help you set up individual features of your site. Our Toolkit features a wide variety of these specialized "web creation assistant" tools, a few of which are described below:

Banner Buddy Quickly generate banner/text link HTML with a few mouse clicks, turning text and graphics into "clickable" links to your web site.

Contact Form Wizard Easily creates contact forms for use on your website. Enter your details and then let this easy to use software create everything you need automatically.

Affiliate Page Maker An easy to use tool to create and promote affiliate programs on the Internet. It automatically creates batches of search engine friendly web pages designed to promote affiliate programs for you, with minimal effort.

ThumbNailer A simple, easy to use tool to make small "thumbnail" image of whole groups of photos in one go, saving you hours when building any type of online shopping site.

Picture Gallery Maker Makes complete picture gallery style web pages of your photos using a simple wizard interface.

Screen Capture Software An easy to use program that will capture screenshots from your computer, ideal when creating instruction or demonstration web pages.

HTML Compressor Compresses your web pages to reduce download times, while leaving them fully readable by web browsers. The average visitor to your site will wait just 8 seconds for your page to download. This professional, easy to use software can increase the number of visitors who stick around to actually read your pages.

Site From Hackers And Thieves Most webmasters are unaware of how much money they lose to hackers and thieves every day. Almost all webmasters promote some form of affiliate program, yet most continually throw away a large proportion of their income, by failing to apply a simple security solution.

Many webmasters join some form of promotional service such as a traffic exchange, without realizing how easily their competitors can hack the associated forms and steal their traffic. The open nature of the

Internet makes it very vulnerable to a very wide range of security issues. Fortunately there are tools available which can stop many of these attacks instantly ...

Affiliate Diamond The Easy Way To Protect Your Affiliate Commissions

If you are successfully promoting any affiliate program, you are almost certainly getting far less commission than you are entitled to. Your commissions are being stolen by those who modify your affiliate links before buying the product you are promoting. You are also losing valuable commissions to those who simply "chop" your affiliate links. Tests have shown that these effects combined can cost you up to half your commissions. AX Gold's Affiliate Diamond is the Internet's leading solution for protecting your affiliate links. It automatically creates all 4 of the commonly used protection mechanisms and includes a fully automated FTP uploader to install the protection automatically on your web site.

HTML Encryptor Protect Your Web Site From Internet Pirates

Internet piracy is on the increase. Pirates can quickly and easily copy part or all of your web site and then compete directly against you. HTML Encryptor will encrypt your web pages making it very difficult for others to copy your pages, whilst leaving them fully readable by Internet browsers. Use this software to keep others from viewing your source code, prevent printing, offline viewing and caching and disable right clicking and text selection. You can even make your web pages only accessible from a specific referrer.

HTML Security Report Are Your Visitors Stealing From You? Exposed At Last: The Dirty Methods Internet Thieves Use To Quietly Steal Your Profits... And What You Can Do To Stop Them

The Internet is filled with thieves that continuously surf to find sites with good quality marketing but poor security so they can: copy the site, completely replicate the marketing efforts of the owner and sell everything at a lower the price There is nothing on the whole wide Internet that can be compared to the information you will find in this report. This is brand new, 100 original content!

Download Page Protector Stop Thieves Stealing Your Ebooks And Software Products

If you sell ebooks or software from your web site, you are almost certainly being ripped off by Internet thieves. Download Page Protector is another one of AX Gold's easy to use security tools. Simply choose a security code number and this highly effective tool will security lock your product download pages in 2 seconds flat, stopping thieves in their tracks.

----- Easily Build Your Own Money-Making List

Every successful marketer will tell you that building your own newsletter or mailing list is the key to online success. The many professional marketing guides in this collection will show you the benefits of having your own list and teach you how to create a list. Our Toolkit also includes a set of specialist tools that will

help you to build and operate your own list with ease... Spinning Popup Maker The Latest Technology Makes It Easy To Attract Subscribers The Spinning Popup Maker offers the very latest technology to create stunning subscribe forms that spin their way into your web pages, immediately catching the eye of your visitor and drawing their attention to your signup offer. These "popups" appear automatically when anyone visits your web pages and are not blocked by popup blockers. To see how great these popups look for yourself, just click [here](#). You can use the Spinning Popup Maker software to create an unlimited number of different popups for your site, advertising your newsletter or anything else you want. Adding stunning, professional looking effects to your web pages and attracting subscribers has never been so easy! Magic Subscriber Another Easy Way To Attract Subscribers Magic Subscriber offers another highly effective, well established solution for recruiting subscribers. As soon as visitors arrive at your site, Magic Subscriber pops up a confirmation box asking them to subscribe to your newsletter. Visitors click just one button to be instantly subscribed. What's more, there's no danger of visitors entering their email address incorrectly as the email address comes directly from their email client. This solution is being used by many top marketers to build their lists. Now you can quickly and easily apply the same technique to your business. AX Gold Filter And Format Software Instantly Protect Your Emails From The Spam Filters One of the biggest problems with operating a mailing list is that your emails can be blocked by Spam filters. The result is that a large percentage of your emails fail to reach your subscribers. Our special Filter And Format software will help protect you from this problem. Spam filters are triggered by certain key words and phrases in the email. The software will automatically identify key words and phrases that trigger spam filters and modify them by inserting a special character, leaving the message still readable by humans but avoiding triggering the spam filters. The software will also automatically format your emails to a standard column width (usually 60 characters) which makes the result look more professional. Now you can professionally format your emails and reduce losses to spam filters, all with just a few mouse clicks! Alan, This is really an impressive line-up of resources with so many excellent technical resources, templates, guides, videos, software and ebooks for webmasters. I am highly recommending this to my own web hosting customers. Thanks for a great product! Greg Hughes Teknon Media tekonmedia.com
