Working with Nature - Shifting Paradigms, brings together the science and research supporting an organic, holistic approach to horticulture. This book is a journey into the garden and the world as a whole in ways never likely seen or considered. The author has layed out many of the connections and processes at work when light, air, water, soil and life interact and transform the environment. When working in alignment with nature, many common problems never occur because one is not trying to go outside the natural laws that constrain us all. Instead of struggling to build and control a synthetic environment, one can now identify the existing environmental envelope and work with the natural forces to create and realize horticultural objectives. Once these relationships are seen, so many puzzles will disappear and many mysteries will now "just make sense". Author: Hermary, Heide Publisher: Gaia College Inc.
