

# Zu Gedächtnisspanne, Schlußfolgerndem Denken Sequentiellem Gedächtnis Beim Kind - Arno Krause

[DOWNLOAD HERE](#)

Zusammenfassung Während die typische Alterszunahme der Gedächtnisspanne von der Kindheit bis ins junge Erwachsenenalter bereits in sehr frühen Untersuchungen dokumentiert ist, hat eine verteilte entwicklungspsychologische Analyse der Gedächtnisspannen-Aufgabe jedoch erst Anfang der 70er Jahre eingesetzt. Eine wichtige Rolle spielen dabei Kontrollprozesse, die etwa ab dem 3. Lj. stufenweise entwickelt werden. Für die Gedächtnisspanne-Altersdifferenzen werden Entwicklungsveränderungen hinsichtlich strategischer Prozesse, nicht-strategischer Prozesse oder der strukturellen Kapazität verantwortlich gemacht. Als zeitlich dimensionierter Aspekt der strukturellen Kapazität tritt dabei das Phänomen der Artikulatorischen Memorier-Schleife auf. -- Schließlich wird im Schlußteil der Arbeit über Ergebnisse berichtet, inwieweit schlechte Leser eine Störung des Gedächtnisses für Reihenfolgen aufweisen, was mittels sequentieller Gedächtnisaufgaben untersucht wurde. Schlagworte Artikulatorische Memorier-Schleife | Denk- und Gedächtnisleistungen | Elaboration | Gedächtnisspanne | Gruppierung | Informationsverarbeitungsgeschwindigkeit | intentionales Behalten | Kontrollprozesse | Kurzzeitgedächtnis | Legasthenie | Lesen | (Nicht-) zusammenhangsrelevante Schlußfolgerungen | (Nicht-) strategische Prozesse | Rehearsal | Rekodierung | Sequentielle Gedächtnisaufgaben | Sequentielles Gedächtnis | Strukturelle Kapazität | Verbalisierung. Summary Although typical age increases of the memory span from childhood to adulthood are documented since more than hundred years ago, studies stressing on the developmental psychology only have started during early seventies. Control processes which are developed from the age of three on are playing an important part in there. Developmental changes concerning strategic, non-strategic processes and the structural capacity are considered responsible for age differences in memory span. In this case the articulatory rehearsal loop occurs as time-limited aspect of structural capacity. -- Finally we inform about results, if and how far retarded readers suffer from lacks in detecting serial memory tasks. Key-words articulatory rehearsal loop | control process | elaboration | grouping | Information processing

speed | intentional retaining | legasthenia | memory performances | memory span | (non-)strategic processes | recombination | rehearsal | sequential memory | sequential memory tasks | short term memory | structural capacity | verbalization. Author: Krause, Arno Publisher: GRIN Verlag Illustration: N Language: GER Title: Zu Gedächtnisspanne, schlußfolgerndem Denken sequentiellm Gedächtnis beim Kind Pages: 00020 (Encrypted PDF) On Sale: 2010-01-01 SKU-13/ISBN: 9783640579433 Category: Psychology : Research & Methodology
