Experimental electronic fused with jungle/break beat/DnB and a good measure of ambient flow. 21 MP3 Songs ELECTRONIC: Drum 'n Bass/Jungle, ELECTRONIC: Experimental Details: Olivia Neutron-Bomb is a musician, a machine (her desires), and his waking dream. Science has achieved the cold fusion of trance with liquid gray matter. Tribal electrosonic propulsion systems leak orgasmic primal sequences into organic hallucinations. 15 years of music equates 2 hours of unrelenting ecstasy... Visceral phenomena bridge the gap between real reality and pure real fantasy, teetering on the edge of perception like so much audible garbage piled too high in the collective psychic refuse bin, poised for collapse. During retrogradation, sit back and relax. 4 years of collaboration with the goddess Freya (choreographer of the eternal dance and ethereal fairy princess) culminating in the fiery rebirth of a wandering soul, becoming something vast and infinitely more unknowable than he was. Wings spread into the ether, born to escape three dimensions and shatter the fourth with a digital cry. If evolving... do not look back. Cooling again to spiral in and start from the beginning. The story is the same, as for anyone, each sound a picture frozen in time, locked in crystal and lost forever. Always striving for perfection in mutation; never achieving more than a note at a time, the building blocks of creation, an echo in eternity...
