Pop/rock with a dark and cynical edge. I prefer to have the potential fan listen and judge for themselves as the songs are quite eclectic from mellow to rock/pop 15 MP3 Songs POP: California Pop, ROCK: Modern Rock Details: I'm a starving artist well not really but I would be if I tried to make a living working on my music. ;- ) I'm looking to get exposure for my songs. My name is Robert J. Bartsch. I've been writing under the pseudo name SchizoPhobia since 1997. I've composed, played, and recorded well over 60 songs in my catalog. They range from instrumental guitar, techno, rock/pop, new age and vocals. I do all the instruments on the 4 CDs I've released. I'm looking to, not only get my music out there, but help you put some music out that won't cost a boatload of money. I don't like to elaborate song styles as it's all up to the listener on how a song is interpreted. I hope to find new listeners as well as friends through my songs. My advice is to check out as many samples as you'd like on CDBaby or you're welcome to check out samples at my web site [schizophrenia.com](http://schizophrenia.com). Thanks for reading :- )
