Templates In A Box - Web 2.0 Templates..... Have You have just completed your newest digital product and it is almost ready to enter the Internet marketplace. "Almost ready"... yeah, right. The Internet marketplace is completely saturated with many other digital products, thus making your product stand out of the crowd is going to be your biggest challenge. Suffice to say, your first impression to a visitor of your site will either convert to a sale, or result in them clicking that little X at the top of the browser window leaving your site possibly FOREVER. With billions of prospects waiting to be customers on the Internet, they can't touch or feel anything digital in nature letting alone taking a peak into them! And the first impression is very crucial, it can very well be the deciding factor between YOUR product and your competitor's. Since your prospect can't even get the icing of the cake, let's rephrase that a bit I'm going to ask you a very important question... THE QUESTION IS THIS! If the prospect has to choose ONLY ONE product, "Yours" Or Your "Competitors" which one would he choose? The most expensive-looking professionally designed sales page, of course, price-to-price or not. You certainly DON'T want to lose a lot of potential sales simply owing to lousy-looking designs you use for your product no matter how good

your sales letter may be, because the bottom-line is that your prospects are seeing your digital product at a glance, and it takes a good 5 seconds for your prospect to either stay or turn away. Another school of marketing lesson says that if you're going to be in business, dress in a business manner! After all, dressing your product well by giving it a professional looking design goes to show how serious you take your business and your prospects will be able to tell that, consciously or not.
