

# Mechanics And Model-based Control Of Smart Materials And Structures

[DOWNLOAD HERE](#)

T. Adachi: Energy Absorption of Axially-Impacted Column Controlled by Transverse Impact - C. Adam, T. Furtmüller: Seismic Performance of Tuned Mass Dampers - H. Bremer: Problems in Fast Moving Non-Holonomic Elastic Systems - F. Casciati, Z. Chen: Using GPS Sensors in Structural Mechanics - L. Faravelli, C. Fuggini, F. Ubertini: Hybrid Control Procedures in Mitigating Cable Vibrations - T. Furukawa: Thermal Stress Analysis in a Functionally Graded Material Considering Finite Thermal Wave Speed - U. Gabbert, S. Kari, N. Bohn, H. Berger: Numerical Homogenization and Optimization of Smart Composite Materials - R. Heuer, S. Mehdi Yousefi: Hybrid Bell Tower Like Structures in Earthquake Environment - H. Irschik, M. Krommer, M. Gusenbauer: Tracking of Stresses: A Further Step Towards Ageless Structures - M. Ishihara, Y. Watanabe, N. Noda: Non-Linear Dynamic Deformation of a Piezothermoelastic Laminate - B. Jakoby, E. K. Reichel, F. Lucklum, B. Weiss, C. Riesch, F. Keplinger, R. Beigelbeck, W. Hilber: Determining Liquid Properties Using Mechanically Vibrating Sensors - R. Kawamura, H. Fujita, K. Heguri, Y. Tanigawa: Mathematical Analysis of Flexural Vibration for a Functionally Graded Material Plate and Vibration Suppression by Flexural Wave Control - M. Krommer, M. Zellhofer: Monitoring and Control of Multi-Storey Frame Structures by Strain-Type Actuators and Sensors - X. Ootao: Transient Piezothermoelastic Problem of a Functionally Graded Thermopiezoelectric Cylindrical Panel - M. Reichhartinger, M. Horn, A. Hofer: Control of an Electronic Throttle Valve for Drive-by-Wire Applications - T. Rittenschober, K. Schlacher: Output Regulation of Smart Structures, Theory and Practice - A. Saimoto: Analysis of Weld Induced Plasticity by BFM - Y. Shibuya: Evaluation of Internal Friction of Viscoelastic Composites with Meso-Scale Structures for Vibration Damping of Mechanical Structures - T. Tsuji, T. Kurimoto, T. Shibuya: An Identification Method of the Time Dependence of the Impact Force by Using Acoustic Response and FEM Analysis - S. Ueda: Infinite Row of Parallel Cracks in a Piezoelectric Material Strip Under Mechanical and Transient Thermal Loadings - K. Watanabe, N. Sumi: Elastodynamic Doppler Effects by a Moving Interface - C. Zehetner, J. Gerstmayr: Compensation of Flexible Vibrations in a Two-Link Robot by Piezoelectric Actuation - F. Ziegler: The

Basis of Optimal Active (Static and Dynamic) Shape- and Stress-Control by Means of Smart Materials

EAN/ISBN : 9783211994849 Publisher(s): Springer, Wien Discussed keywords: Intelligente Werkstoffe

Format: ePub/PDF Author(s): Irschik, Hans - Krommer, Michael - Watanabe, Kazumi - Furukawa, Toshio
