

Mp3 Azimuth - Photographs

[DOWNLOAD HERE](#)

Reflective, positively uplifting, jazz influenced piano music. 12 MP3 Songs JAZZ: Smooth Jazz, EASY LISTENING: Background Music Details: Ed Goldfarb masterfully plays the keys on this album and is the focus of this CD. Some of his past credits include a gold record and the musical production of the Apocalypse Now DVD soundtrack. He is an amazing talent and this CD reflects his depth and outlook throughout every track. Azimuth is a radio entity. We've written and recorded highly produced music for 20 years. This piano album is an extension of our music and meant to reach out to the world through different genres. If a song does not have a good melody, it is not a good song. Trust us, the song writing and arrangements on "Photographs" are as good as it gets. Much time and effort were put into the production of this album with the intention of blessing our listeners. This album sounds like Keith Jarrett, George Winston or Bruce Hornsby. So relax and have a listen, we'd appreciate your purchasing this CD as we need to sell 700 to break even!!! :)
