Indie rock from the Uk and Australian band with big guitars and bass and a lilting alt-country vocal 11
MP3 Songs ROCK: Emo, ROCK: Jam-band Details: The Gasolineros were formed in London in 2003 by
three guys who found themselves stuck in a rehearsal room with nowhere to get out of the rain. Mark -
Singer - from Ireland came across Welsh Ray and English Alan as they sat in the lobby waiting for the
rain to pass. That was 2 years ago - english rain never stops! They guys got together and formed the
gasolineros for fun. Once they began gigging on the London scene they were signed by Australian based
record label - BARIA and after that all hell broke loose. Ray helped the DARKNESS to see the light and is
credited on their first album. Alan was offered a job working as a reporter for Mr Murdoch where he is a
music journo for the London Times and Mark is currently living out of a suitcase between London , NY
and Australia where his beloved goldfish live. The album was made in the Uk with the help of Charlie
Francis (REM. High LLAMAS) and has been a great success in Australia. It is such a success in fact that
the Pacific kangaroo was used to hop over the pond to deliver it to the lovely americans! So here you are
- if you like it please buy it and we promise to send them over to your house -- no wait --- if you don;t buy
it we will do that!
