Related styles: COUNTRY: Americana, FOLK: Alternative Folk People who are interested in Bob Dylan Ryan Adams Peter Rowan should consider this download. Details: Stuart McNair's "Growing a Garden" is an intimate, fun, new collection of Stuart's unique original songs. There are 18 songs here, each performed live in studio with an acoustic guitar and harmonicas. Stuart recorded each song without the help of tracking or overdubbing, without his band, and without a net. "Even though I love playing with other musicians on stage, I try to write song that can stand on their own. A good song should be powerful solo", says Stuart. "Plus, some songs work best with just a guitar and a voice. I've been saving some of these songs and patiently waiting for the right time to make a record like this". "Growing a Garden" finds Stuart exploring new ground lyrically. Some of the songs are straight country, like "Somewhere in the Middle", and "You Broke My Heart Again". There are love songs, too, like "You Need To Be Danced With", and "Lay You Down". Some of the tunes explore the wonders of the natural world, like "The Birds Were Like a Symphony", and "Ways of Nature". Others deal with personal growth and change, like "Don't Worry", and others bring a positive message for the future, like "Grow the Garden". "Growing a Garden" captures Stuart's uplifting and unforgettable songs with an organic, honest approach. This is a chance to hear Stuart as though he were sitting right next to you on a porch, in a living room, or around a campfire. These songs were recorded in late summer, 2008, at Capture Music in Birmingham, AL, by engineer Mike Creager. The artwork was done by Patrick Mayton of Courageous Press, Birmingham, AL.
