Nautical Punk/Sardonic Garage Rock. 25 MP3 Songs  
ROCK: Punk, ROCK: Modern Rock  
Details: Liner Notes from the Medveds' first CD, "Aging Failures": When I was a younger man, I felt music was something I'd never get tired of. I still felt this way when (against my better judgement) I took on the responsibility of managing a group of also-rans who called themselves the Medveds. Three years later, I have to admit that my feelings have changed. Not only have they turned me against their own fumbling attempts at songs, but they've also made it so that listening to anything is about as fun as getting kicked in the face by a boot covered with dog make. Their dated, monotonous sound assures me that they'll be nothing more than a distant memory by this time next year. If I were you, I wouldn't even bother listening to this disc.
