Dub, Reggae, Rock, World.....Experience the power of dub as Trumystic takes the foundation of dub's predecessors and combines it with a range of influences as diverse as the band itself. Experience a phenomenal introduction to a powerful band and an exciting new sound.... the message is strong and sure and the delivery is compelling and committed. TRUMYSTIC is a 7 piece live dub alliance, on the cutting edge of modern music. With vocalist Kirsty Rock at the helm (as heard on Dub Side of the Moon) partnered with bassist and cofounder Reggie Hodges (High Fidelity Dub Sessions #3), drummer, David Delgado (Yami Bolo, Marcia Griffith), resident sound scientist, Dept. of Dub, and accompanied by guitar, organ and horns, they deliver a ridiculously skilled and exciting musical experience. In 2002 they released the sonically lush album, Current Master, on TMG Records. The band followed the release with an intensive tour across the United States, with over 100 performances in 2003 alone. In addition, TRUMYSTIC contributed to the highly acclaimed Dub Side of the Moon, a reggae interpretation of Pink Floyd's 1977 classic album, which received five star ratings across the board, and stayed on Billboard charts for 48 consecutive weeks. Kirsty Rock's powerful handling of The Great Gig in the Sky has drawn high praise from Clare Torry, the song's original vocalist. Before the end of 2003, the band recorded the single Stand Up, TRUMYSTIC's first collaboration with the most influential Dub producer of the last two decades, Mad Professor, who

added his stamp of excellence to Dub Power. TRUMYSTIC spent 2004 performing over 150 shows nationally, including a 2 week run with dub master Mad Professor live mixing the band, in support of their collaboration. TRUMYSTIC has now embarked on a year long national tour to push out the sound of their epic release. As Dub Power hits the streets so does TRUMYSTIC.....
