Details: CD Info: Come and take a voyage back into time with a twist of futuristic appeal. Yes I'm talking about that classic house sound, fused with jazz, funk, and soul. Renaissance Revival is just that. Remember those tunes that used to make you just rush to the floor and dance till you can't no more, that's what Renaissance Revival brings nonstop. It brings you that joyful feeling that we all need to feel again when we hear music. I remember when I was in my early teens in the early 90's, I was in a dance group, and my dance teacher would bring mixtapes from DC, NYC, Chicago, and other places for us to dance to. When I heard these sounds I knew house was in my life forever. My whole life was house, the way I dress, my hair, everything. For some house was just a phase for me it was permanently imprinted in my DNA. I hope you enjoy the grooves of Renaissance Revival as much as I enjoyed making each in every last one of them. I've been producing for over 15 years now, I am influenced by a wide range of artist and all styles of music. House, Hip-Hop, Jazz, Electronic, Reggae, and much more. The Name: Wise Choice The Sound Shifter I gave myself this name to describe the different elements and style in my music. I can take or make any sound I hear and reshape it, mold it, tweak it, and make it my own. Each song I do is an expression of self, and self wisdom developed throughout my life. Producers that really influenced me: DJ Premiere, J Dilla, Pete Rock, MAW, Tony Humphries, Frankie Knuckles, The Roots, and a whole list of others.
