

Progress In Nanophotonics 1

[DOWNLOAD HERE](#)

Nanophotonics: Dressed photon technology for qualitatively innovative optical devices, fabrication, and systems.- DNA process for quantum dot chain.- Photon enhanced emission microscopy.- Nearfield spectroscopy of metallic nanostructure.- Self-organized fabrication of composite semiconductor quantum dots.- Metallic nanostructure.- Nanophotonic information systems with security. EAN/ISBN : 9783642174810 Publisher(s): Springer, Berlin Discussed keywords: Nanophotonik Format: ePub/PDF Author(s): Ohtsu, Motoichi
