Blogging is little more than an electronic version of something many of you have most likely had and used earlier in your lives, and some of you may still be using to this very day. What is it? Read on to find out. What The Heck Is A 'Blog' Anyway and Why Do I Care? Plain and simple a blog, or weblog as some refer to it, is nothing more than an electronic journal or diary you use to enter your thoughts or ideas using web-based programs. But, a blog can be so much more than this. It can also be used to enhance your online business or personal site. It can be used to offer up tutorials or free content you may not want to include on your regular website. In fact, a blog can be a website in and of itself! Blogs are designed to be whatever it is you want them to be, giving you complete creative control over every aspect of your blog. Using a blog can be very beneficial to you whether you have an online business or you simply need some sort of emotional expressive outlet to be you. And they are extremely easy to create, use, and profit from even if you have never made a blog in your life! If It's So Easy, Why Has No One Used It Before Now? Most likely it's because they just don't know about blogging. While blogging has been around for years it's popularity is just now beginning to grow, and at an alarming rate! There are millions of blogs that can be found all across the internet with millions more expected to be created before the end of 2004. Now is the time to use this simple form of publication to your advantage. Another reason could be that because using and creating a blog is completely free, many online marketers tend to steer away from these types of tactics believing that free solutions have no value and in turn do not work. In most cases, this is true, but not when it comes to blogging. One last reason to ponder is skepticism. Maybe it's hard to believe that something you have never heard of can be so simple to use and give you the freedom to write about what you choose and it can even make you money. Plus it's free too??! Yeah Right! But this is fact and not fiction. It is possible and easy and profitable and you have everything you need all in one kit. So What's In It Already?! You don't buy a car based on what the salesperson is feeding you, and you shouldn't buy anything else that way either. ************************************* #2 INSTANT BLOG & PING AUTOMATED SOFTWARE - $67 value Official Advert: Try not to feel guilty because this really IS almost too easy ... "Who Else Wants Their Entire Site Crawled, Indexed and Ranked Fast -- Without any Hard Work or even SEO Knowledge" If You Want To Consistently Get your Website Pages Spidered and Indexed into all the MAJOR Search Engines... No Matter Who You Are, How Much Experience You Have Or What Kind Of Budget Your limited to... And especially If You're Sick And Tired Of Software and Services being insanely over priced, Then 'Instant Blog and Ping' Desktop Software is for you... "Version 2.0 Just Released - New Added Features" From: *YOURNAMEHERE* Thursday: 5:36 a.m Dear Friend, How much is time worth to your business? The reason I ask you this is because.. exactly 32 days ago I asked the same question to a friend of mine who was in a right dilemma, I'm talking about a Huge Bind. Now I'll tell you later why I asked him that same question... Suppose you could sit down at your computer create a website, upload it then press a few Simple buttons and then sit back and watch search engines spiders hurrying to your site like a moth to a light bulb. Imagine... performing one simple 2 minute task which within days could lead to a stampede of search engine spiders crawling deep down into the 1000's of pages you have created. Imagine then seeing your entire site indexed not in months but within a matter of weeks. -- obviously this means more pages are now in front of hungry consumers which in turn means the potential of earning cash quicker increases. Think about it... anytime you create a new site - you simply turn the tap on... it's

like having the goose that laid the golden egg. Sounds to good to be true? Well, it isn't if you have the right tool. You see dollar-for-dollar nothing comes close to being able to get your website pages crawled, indexed and ranked fast. TIMEOUT: James Comer Albuquerque, New Mexico Affordable, Easy to Use and the Search Engines Spiders can't get enough! James, works part time on the net and after using Instant Blog and Ping not only has he managed to have more time to get more sites created but best of all, his current sites are getting crawled and indexed faster !! He noticed Crawling began within 4 days of using the software! Here is What James Had To Say I build a lot of websites online- both manual and using the help of page generators. For a long time, I have been frustrated by the length of time that it takes just waiting to get my sites spidered and indexed. Although I did find that manually blogging and pinging helped- the time that it took to post a few lines from every page of my site onto a blog and then insert a link, and then taking the time to ping was not only starting to eat into my time but it was starting to become a a real pain! I want to use my time to create sites! For quite some time I've been searching around for an affordable solution. I knew there was a service available online that I could use that would do all the work for me- but, I wasn't too eager having to pay the amount being asked.. it was just too much for me, probably ok for others. I came across 2 pieces of software available that could handle the job, but found them either too expensive for me- or took the control away from me as to the schedule they were blogging and pinging on. So when I came across Instant Blog and Ping- which was way more reasonably priced for my wallet- I finally had the chance to get my hands on software that not only Automates all the work at a price I can afford, but I can run the jobs on my time- not some schedule that is set by the administrator of some other server! Seeing Yahoo Slurp in my Stats and MSN Spiders visiting my site using the blog and ping method always gets me excited.. now I'm even more pumped as I can set it and forget it. It does all the work for me. After using Instant Blog and Ping software, I saw spiders visiting my new site within 4 days! Using the Blog and Ping method "manually", my adsense income increased substantially. Now that I'm using Instant Blog and Ping- it has freed me up to focus on creating more sites. That alone has saved me a ton of Time and Money! Thanks Jon, for creating a program that's not only going to help me now and in the future, but it's also very simple to use. I also appreciate you offering it a price that just about anyone can justify spending. Instant Blog and Ping also has an extra added bonus- it doesn't cause your wife to ask "How MUCH did you spend on that? You bought what?" :) Thanks Again, James Comer Hi, I want to congratulate you on coming up with this breakthrough

resource! It's a powerful and time-saving software that anyone interested in getting their entire site indexed fast have to use. One thing I'd like to comment is your world class customer service and responsiveness to customer enquiries...it's very rare these days! Sincerely, Ewen Chia Click here to get your copy today, or continue reading... Think about it! A Software Program that completely automates the whole blog and ping process freeing you up to time into the areas of your business that you need to. Simply put, Instant Blog and Ping is like having a little automatic, money-making robot working for you, tirelessly.. day and night. See this is the thing.. Unless you have had your head under a rock for the past 12 months or your completely new to the internet, I'm going to go out on a limb here and assume you have heard about what Blog and Ping is, if not let me fill you in. Search Engine Optimization Junkies, Internet Entrepreneurs and Webmasters with the inside scoop have been Buzzing for months about a super fast method of getting your entire site pages crawled within a week, and even in some cases within a Matter of Days. But Blogging and Pinging Every Page is the Hard Part... You see the ever since the release of the famous Blog and Ping Tutorials months ago, the process taught people manually how to -- 1. Create a Blogger account at Bloggerand setup the settings (shown in software guide) 2. Create a my.yahoo account and take the RSS URL found in Bloggerand place it your MYYAHOO account 3. Go back to your Blog and Post pages from the site you want crawled and indexed to the blog 4. Ping the Blog Aggregator like Yahoo and place like Pingomatic and wala! Whilst this sounds simple enough ...and well ...it is if you have only 7 pages on your website and 1 website, but many people doing business online have lots of site and lots of pages, and not a huge whack of time to spend posting pages to their blog in set intervals. So people have been faced with 3 options * Post every Page from your Site to a Bloggeraccount Manually * Post every Page from your Site to a Bloggeraccount Using a Paid Service * Post every Page from your Site to a Bloggeraccount Using Expensive Software Now, It could take you days if not weeks to post manually and cost you a small fortune paying out to a paid service or buying software that starts in the hundreds. So Instead of knocking yourself out trying to post every page one by one or saving up for software that your really not sure is worth the high ticket price. You can have a 24/7, Set and Forget, Search Engine Spider Magnet for your business, that will do all this for you.. and will be ready at your beck and call -- announcing: " Instant Blog and Ping Automated Desktop Software" In just 2 minutes you can press a few simple buttons input your blog info hit start and watch this extremely powerful software work its magic whilst you continue to go about your day to day life. Get Your Website Listed In Major Engines Quickly. . . And Updated More Frequently Previously Undisclosed Method for "Blogging and Pinging Will Work For Anyone Wanting an Internet Presence--Quickly and Easily Dear Internet Marketer, Lets face it, putting together a website is toughbut getting that website into the major search engines like Google and Yahoo is even tougher! Theres no doubt, the most difficult marketing technique for any Internet marketer to learn is how to get your sites indexed. And until you master it, the web site that you are counting on to generate sales, build your reputation, or generate AdSense revenue is just floating in cyberspace--worthless. No wonder it seems to take forever and ever. And it sometimes it really IS Forever and Ever!! That is why there are countless sites with advice, tons of expensive software, and plenty of costly seminars on how to get a search engine's "web crawler" to "spider" (that is "geek" for find and enter into the search engine) your site. And yet, you and others just keep getting frustrated until you spend more hours in research, pour more effort into "tweaking" your site, or waste even more money on someone's outdated ideas--all while time and opportunity are still slipping through your fingers. The simple truth is that until the search engine finds your site and decides to spider it, nothing else matters. This is where the newly discovered method of Blogging and Pinging proves so valuable. It gets your site noticed and spidered quickly and brings the crawler back more often. Blogging and Pinging is fast. It is easy. You dont have to be a technical guru to understand the concept or learn the method! All you have to do is follow the step-by-step instructions. And even better, the entire process is completely free! No new software to buy, no need to purchase subscriptions to new services, no renewal fees truly FREE! Like you, I had read hundreds of articles about blogging and lots of speculation about its impact on search engines. While blogging is increasingly popular, blogging alone does nothing for search engines but give them millions of new--usually worthless--pages to search--and often screen out. The ability to "subscribe" to web sites and blogs through RSS Feeds (called syndication) is also changing the way the web works. These feeds automatically check (called "pinging") web sites for changes, and send the changes to another site that

has requested to be sent the changes. Of course, no one can subscribe to a site that they can't find!! Two big web trends: * Blogging - easy to create with free and relevant content * Syndication - lets a site generate its own activity (pinging) I knew there must be a way to put these two trends to work to get web sites quickly spidered and frequently updated on Google, Yahoo, MSN, and other search engines. I spent hundreds of hours figuring out the Blog and Ping process. You see, these are two separate processes that happen on the web every day. Lots was written about each one but little is written about using them together in a way that would drive search engines to sites--at least not in a way that worked!! I was about to give up when the thought hit me--"Everyone is making this seem hard, if not impossible." I stepped back, tuned out the hype, and realized there was a simple solution. Even with all my hours of research, it took months more to discover the simple, workable connection between blogging and pinging that capitalized on the design and function of search engines. The secret is that each of a few simple steps has to be done exactly right and in the right sequence on two separate web functions. Now, don't get worried. I have put these steps one - by - one in "The Blog and Ping Internet Marketing Tutorial" and provide the simplest and easiest way to do each one. There is no "trial and error"! The tutorial contains over 75 screen shots showing you exactly what to do. You can get a real web presence with less effort and no costly services or software. No more waiting and waiting and waiting. No lost opportunity. AND faster sales mean faster cash flow! Are you fed up with methods that don't work? How many times have you created the perfect website only to find that no matter what you do or what you try, Google simply wont pick it up? How many great ideas have you had go down the financial toilet simply because the Yahoo spiders took too long to visit and index your site? How many hours have you wasted submitting your site to every known search engine only to find that 4 months later you were no further than you when you first started? Are you ready to get results? Theres no doubt, the most difficult marketing technique for any Internet marketer to learn is how to get your sites indexed. Until you master it, the web site that you are counting on to generate sales, build your reputation, or generate AdSense revenue is just floating in cyberspace--worthless. "Okay - So What's The Cost For This Incredible Resource?" Some friends urged me to deliver this exclusive information in person only as part of a high-priced seminar where I charged hundreds of dollars per person. When I balked at the travel and time involved, friends in web marketing urged me to use an online seminar. But frankly I don't need a seminar to explain my method--and besides what I have to offer is a step-by-step process to follow. No lengthy explanations of why it works are

necessary. And you don't have more time to waste! What you need are the simple, but critically important, steps to follow in just the right order to get your site working for you. So this one-of-a-kind resource, "The Blog and Ping Tutorial, can be for downloaded today for only $47.00 -- With Master Resale Rights!!!
