

Methods In Microbiology, Volume 22.

[DOWNLOAD HERE](#)

Established for almost 30 years, Methods in Microbiology is the most prestigious series devoted to techniques and methodology in the field. Now totally revamped, revitalized, with a new format and expanded scope, Methods in Microbiology will continue to provide you with tried and tested, cutting-edge protocols to directly benefit your research. Immunology of Infection, edited by two of the foremost figures in the field, presents the most appropriate, up-to-date techniques in the detail you require. The layout is structured for ease of reference, and the volume will be essential reading for all researchers working in microbiology, immunology, virology, mycology, and parasitology. The new volume provides a carefully selected collection of immunological techniques for the microbiologist wishing to study host-pathogen relationships in vivo and in vitro. This multi-authored book has succeeded in bringing together experts from various fields of molecular and cellular immunology who provide ready-to-use recipes for the ex vivo and in vitro analysis of anti-infective immunity. EAN/ISBN : 9780080860510 Publisher(s): Elsevier Science & Technology Format: ePub/PDF Author(s): Norris, R. J.R. - Grigorova
